Entry-level Pharm.D. students must complete a minimum of 10 hours of program electives prior to graduation. Elective course work is to be taken while enrolled in the Doctor of Pharmacy program. We cannot count any courses taken prior to matriculation into the Pharm.D. program. Electives may be pharmacy courses or those taken in other departments. The faculty has not prescribed a list of courses from which these electives must be taken. However, the student must get the approval of their faculty advisor with regard to elective courses to be taken. **It is important that students get the approval of their faculty advisory before taking proposed elective courses.**
